AI-ROBOTICS vs COVID-19

Have you developed an AI system, built a robotic tool or have ideas on the role that technology and AI in particular could play during the current healthcare crisis?

Join our initiative, launched in the frame of the [common European response to the outbreak of COVID-19](#).

Our main aim is to populate the following repositories with deployable artificial intelligence and robotics solutions:

- [Access the Solutions Repository](#).

- [Access the Initiatives Repository](#).

We also set up a [dedicated space](#) to discuss further ideas on how such solutions can be deployed either immediately or in the short to mid-term in the context of disease prevention, diagnosis or treatment.

White Paper on AI - a European approach: Have your say!

The European Commission recently launched a consultation on artificial intelligence. All stakeholders are invited to provide their feedback by 31 May 2020.

The consultation comes along with the [White Paper](#) aimed to foster a European ecosystem of excellence and trust in AI and a [Report](#) on the safety and liability aspects of AI.

The White Paper proposes:

- Measures that will streamline research, foster collaboration between Member States and increase investment into AI development and deployment;
- Policy options for a future EU regulatory framework that would determine the types of legal requirements that would apply to relevant actors, with a particular focus on high-risk applications.

Feedback can be provided in one of the following EU languages:

[BG](#) | [CS](#) | [DE](#) | [DA](#) | [EL](#) | [EN](#) | [ES](#) | [ET](#) | [FI](#) | [FR](#) | [HR](#) | [HU](#) | [IT](#) | [LT](#) | [LV](#) | [MT](#) | [NL](#) | [PL](#) | [PT](#) | [RO](#) | [SK](#) | [SL](#) | [SV](#)
